

Lymeware Releases New CABS Viewer Product with full Customer Service Record (CSR) Support

CABS Viewer now supports all CABS BOS records, including Customer Service Record (CSR) formats

Old Lyme, Connecticut, 27 June 2005 - Lymeware Corporation, an innovative provider of Telecom and security software solutions, today announced a new release of its industry standard CABS Viewer billing product. The new release now supports all CABS (Carrier Access Billing System) BOS (Billing Output Specifications) records, including all Billing Records (10-XX-XX), all Supporting Detail Records (30-XX-XX), and all Customer Service Record (CSR) Records (40-XX-XX), for full standard record coverage.

"We are extremely pleased to support the full range of CABS BOS records, used by all the major service providers within the telecom industry," said Carl Fox, Director of Sales for Lymeware. "This coverage gives our customers the ability to receive bills from any CABS-compliant carrier, including wholesale, retail and UNE (Unbundled Network Elements) usage."

The Lymeware CABS Viewer product supports the CABS BOS standards, as defined by the Alliance for Telecommunications Industry Solutions (ATIS) Order and Billing Forum (OBF) subcommittee and as owned by Telcordia Technologies. The majority of large access service providers issue Carrier Access Bills following the CABS BOS standard format.

Lymeware has provided robust, secure, fast transport of EDI and non-EDI messages and electronic messaging since 1999, and has extensive Telecommunications, communications and security experience.

A free 30-day evaluation of the full CABS Viewer product is available upon request.

About Lymeware

Lymeware Corporation, founded in 1995, provides secure messaging solutions, XML/EDI integration frameworks, and consulting services for Fortune 1000 companies, CLECs and other service providers throughout the US. Lymeware built the first ILEC EDI ordering platform, several CLEC ordering systems, the first IA to successfully test with all of the major ILECs, the first XML-based OSS to support EDI and several other innovations in the Telecom Industry. Lymeware Corporation is privately held and has offices in Old Lyme, Connecticut.
